DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2 and 4-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Jennings (US 4,825,471).

Jennings discloses a garment and device combination and the method of making the garment (10) and a fabric sheet 20 secured to the garment and a closeable predetermined portion, flap(32) with a releasable fastener (34) with a user-activatable device, a radio, not shown in the figures as described in col. 3, line 64. Any desired device can be placed and stored in the Jennings pocket. (See Jennings, figures 1 and 2 and col. 3, line 14 – 65).

Claim Objections

Claim 1 is objected to because of the following informalities: in line 4, “releasably” should read - - releasable- -. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which

Art Unit: 3765

said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jennings (US 4825471) in view of Humble et al (US 4,254,868).

Jennings discloses the invention substantially as claimed and as discussed above except for the device as being in a closed envelope. Humble et al discloses a security device that has a plastic moisture impervious cover(10). See Humble et al (Col. 4, lines 11-27). The device of Humble et al may be placed in a garment pocket as desired.
